Professional Summary

Computer Science engineer specializing in Artificial Intelligence & Machine Learning with hands-on experience in full-stack development using Java, Spring Boot, and React. Adept at building scalable, user-centric applications and integrating RESTful APIs with relational databases like MySQL. Skilled in writing clean, maintainable code and translating complex problems into robust software solutions. Certified in Microsoft Azure and proficient in using modern development tools like Git, Postman. Actively seeking opportunities to contribute to high-impact tech teams and drive innovation through practical engineering

Technical Skills

- **Programming Languages:** Java, SQL,python, JavaScript (Basics)
- **Frameworks:** Spring Boot, Flask
- **Frontend:** HTML, CSS, Bootstrap, React
- **Database:** MySQL
- **Tools:** Git, GitHub, Postman, VS Code, IntelliJ, Eclipse, Jupyter, Google Colab
- **Soft Skills:** Problem-Solving, Analytical Thinking, Collaboration, Continuous Learning

Education

- **Bachelor of Computer Science Engineering in Artificial Intelligence & Machine Learning**
Saraswati College of Engineering, Kharghar, Navi Mumbai — 2025
- **HSC (12th Grade), Science**
M.J College, Jalgaon, Maharashtra State Board | Percentage: 78.33% — 2021
- **SSC (10th Grade)**
Saraswati Vidya Mandir , Maharashtra State Board | Percentage:76.20 % — 2019

Projects

1) Smart Farm Using Machine Learning

GitHub: [Smart Farm](#)

- Developed a Smart Farm system integrating ML models for **crop recommendation, fertilizer suggestion, and disease detection**.
- Built an interactive dashboard using Django with **multilingual support** for regional users (e.g., English & Marathi).
- Integrated a chatbot to assist users with queries and guide them through the system.
- Trained models using algorithms like **Random Forest** to provide accurate, data-driven agricultural insights.

2) Big Mart Sales Prediction

GitHub: [Big-Mart Sales Prediction](#)

- Developed a predictive model to forecast product sales across retail outlets using machine learning algorithms (**Linear Regression, Random Forest**).
- Cleaned and preprocessed data, handling missing values and encoding categorical variables for better model accuracy.
- Conducted exploratory data analysis (**EDA**) to uncover key patterns and relationships in sales data.
- Evaluated model performance using **RMSE**, selecting the best model for accurate sales predictions.

3) Cartify E-Commerce Website

GitHub: [CARTIFY](#)

- Backend: Built using Java and Spring Boot with RESTful APIs for secure and scalable operations.
- Frontend: Designed a responsive UI using React.js for seamless user experience.
- Database: Used MySQL to manage user data, product inventory, and order transactions.
- Implemented features like authentication, product search/filter, admin dashboard, and order history.

Certification

- **Microsoft Azure - AZ 900 Fundamentals**
- **Udemy – Java Programming**
